

**Asbestos, Environmental & Mass Tort News – Bik Moy joins Gnarus as Principal, establishes Insurance Archaeology practice.**

Consulting firm Gnarus Advisors LLC expanded its practice as Bik Moy, a leader in the field of insurance archaeology for over 23 years, joined the firm. Ms. Moy has extensive experience in researching and reconstructing insurance and reinsurance programs. This includes locating, documenting, analyzing, summarizing and consulting on historic insurance and reinsurance matters. Ms. Moy has significant experience in reconstructing complex and diverse corporate histories and successorship issues arising out of mergers and acquisitions, and has identified legacy insurance coverage, including predecessor, successor, subsidiary, affiliated, related entities of companies for which coverage may exist.

Ms. Moy holds a B.S. in Finance and International Business from the Stern School of Business at New York University. Prior to joining Gnarus, she worked in the environment and insurance claims group at LECG, Navigant Consulting, and the Insurance Archaeology Group (IAG) in New York City.

“As a new member of the team, I look forward to providing enhanced and broader services to my clients by partnering with the experienced and knowledgeable professionals of Gnarus Advisors. The contributions of my Insurance Archaeology practice area naturally complement the existing skill sets and expertise of the Gnarus consultants, and will be of great benefit to many Gnarus clients in need of these services.”

Gnarus Advisors LLC is a boutique consulting firm providing advisory, risk control and expert testimony services to businesses, government agencies and law firms facing complex challenges. We have worked with businesses large and small, international and domestic, public and private, as well as common interest groups, law firms and other advisors for over two decades. We solve business problems, identify and mitigate risk and support litigation efforts through in-depth research, independent and objective analysis and complex quantitative modeling.
